

# Join the University of Michigan for a Summer of Neuroscience!

## Two Programs, One Great Summer

The University of Michigan offers two summer programs in neuroscience research for undergraduates.

SIREN, the Summer Intensive Research Experience in Neuroscience, is a NSF-funded program for students with limited access to neuroscience research.

NURO, the Neuroscience Undergraduate Research Experience, is a NIH-funded Program for students from under-represented groups.

**Work in leading Neuroscience labs for 10 weeks**

**Weekly development workshops**

**Train in science communication with applied improvisation**

**Present in various symposia**

**Enjoy summer in Ann Arbor!**

**A 10 week program that begins Sunday of Memorial Weekend**

**Details**

**Applications accepted:**

**Dec 1, 2023 – Jan 15, 2024**

**Program dates (non-negotiable):**

**Begins Sunday of Memorial Weekend >  
\$6,000 stipend support + housing  
+ travel + social activities**

**The Neuroscience Graduate Program at the University of Michigan is the longest standing neuroscience program in the U.S.**

**About Us**

- 150+ faculty in behavior, cognition, systems, development, senses, genetics, cell & molecular
- 80+ graduate students
